What's new?

New products, new possibilities

Latest innovations from our lab to yours

- Cutting edge solutions for preparatory scale plasmid DNA purification and RNA clean-up
- Automatable options with customizable protocols streamline sample prep
- Explore the latest advancements in DNA / RNA extraction

## What's new? New products, new possibilities

MACHEREY-NAGEL is dedicated to delivering innovative solutions that address common challenges in DNA and RNA purification workflows. Our latest products include options for difficult sample materials, large-scale plasmid purification or RNA clean-up projects, and automated protocols designed to reduce hands-on time and enhance reproducibility. Discover what's new from MACHEREY-NAGEL and see how we can support your lab's evolving needs!
